Virtual wheat demonstration plot tours

On Monday, June 1st at 9:30 a.m. the Cottonwood Extension District will be having a virtual wheat demonstration plot tour for wheat growers, and the supporting ag industries.

This will be in a format of a recorded Zoom meeting. I will moderate and open the plot tour with an introduction of the background information of each variety plot in Barton and Ellis County and recognize the cooperators. After the introduction our Extension specialist will discuss the individual varieties in each demonstration plot as to their strengths, weaknesses, and adaptation. There will be a slide set with a photo of each variety included in the plots.

I have put the signs up at each plot with an information sheet posted in a box for the public to look at any time. The Barton County demonstration plot is located 1/8 of a mile North of Susank on the West side of the blacktop.

I do not yet have the zoom link for the virtual demo plot tours. You can contact either Extension office later this week Great Bend 620-793-1910 or Hays 785-628-9430 for the link or go to our web site www.cottonwood.ksu.edu or Cottonwood District Facebook page for the zoom link.

This will be recorded so you do not have to listen to it live at 9:30 a.m. on June 1st. You can always listen and watch it at a later date.

If you have any questions give me a call at the Hays office.

Stacy Campbell is an Agriculture and Natural Resources agent in the Cottonwood District (which includes Barton and Ellis counties) for K-State Research and Extension. You can contact him by e-mail at scampbel@ksu.edu or calling 785-628-9430.
